OPTICS AND LASER TECHNOLOGY

INDEX TO VOLUME 17 (1985)

Articles

(TN = technical note; L = letter to the editor)

1 A comparative study of side-band Fresnel holograms recorded with self-imaging and general objects *L.V.A.R. Sarma, R.S. Shenoy, S.V. Pappu* 249

2 A constituent analysis of semiconductors using intense visible laser radiation *E. Wintner, A.J. Schmidt* 319

3 A double-beam UV-laser differential absorption method for monitoring tropospheric trace gases *R. Zellner, J. Hägele* 79

4 A fibre-optic sensor for flocculation detection by electric field light scattering *H.H. Trimm, B.R. Jennings, K. Parslow* 321

5 A pulse stacker for time-resolved laser plasma diagnostics *C.N. Danson, C.B. Edwards, I.N. Ross* 99

6 A self-compensating optical delay stage. *E. Wintner* (TN) 159

7 A simple microcomputer-controlled CO_2 laser wavelength tuning system *D. Ignjatijevic, P. Vujkovic Cvijn, M. Sreckovic, I. Pippi* 96

8 A simple ring resonator system *D.J. Biswas, R.G. Harrison* 303

9 A simple technique for the alignment of a ring resonator *J.S. Uppal, J.C. Monga, D.D. Bhawalkar* 215

10 Analysing the quality of the first order diffracted laser beam emerging from an acousto-optic modulator, *D. Pantzer, J. Politch., L. Ek* (TN) 102

11 Biological effects of low-power laser radiation *P. Greguss* (L) 161

12 CO_2 laser welding of copper slabs *M. Dell'Erba* 261

13 Electronic improvement of interferometric measurement of dye laser wavelengths, *J.J.L. Mulders, P.A.M. Steeman, A.H. Kemper, L.W.G. Steenhuysen* 193

14 Fabrication of dielectric-coated metallic, hollow waveguides for infra-red radiation by the electro-deposition of germanium *M. Miyagi, Y. Shimada, S. Nishida* 197

15 Fibre-optic cable for CO and CO_2 laser power transmission *V.S. Alejnikov, V.G. Artjushenko, V.P. Belyaev, V.V. Vojtsekhovsky, E.M. Dianov, I.S. Lisitsky, L.N. Butvina, V.I. Masychev, T.N. Savenkova, V.K. Sysoev* 213

16 Field methane tracking with a portable and real-time open-gas monitor based on a cw-driven Pb-salt diode laser, *R. Koga, M. Kosaka, H. Sano* 139

17 Fringe sharpening in lateral shear interferometry *C. Joenathan, R.K. Mohanty, R.S. Sirohi* 310

18 Fundamentals of optical design in rotating mirror cameras *M.I. Finston* 83

19 High speed drilling by YAG laser *Y.X. Chen, W.Z. Zhang* 205

20 High speed photography of the interaction of a water drop with a supersonic sphere, *I.A. Dukhovski, V.A. Komissaruk, P.I. Kovalev, N.P. Mende* 148

21 Holographic distant display in dichromated gelatin *S. Sjölinder, D. von Gegerfelt* 305

22 Interaction of optical radiation with living matter *P. Greguss* 151

23 Interference with beams sheared in orthogonal axes *B. Sen, D. Sen* 315

24 Interferometer with holographic optics *I.S. Zeilikovich, E.M. Platonov* 145

25 Measurement of sensitivities for thermal recording of laser beams *C.R. Prasad, K.A. Nirmala, Prabha Venkatesh* 297

26 Moiré displacement measurement technique for a linear encoder *K. Hane, Y. Uchida, S. Hattori* 89

27 Optical measurement of the viability of stored human platelets *M.A. Bellhouse, I. Ross, C.C. Entwistle, B.J. Bellhouse* 27

28 Optical monitoring of glucose concentration *I.N. Ross, A. Mbanu* 31

29 Optimization considerations in the design of active night viewing systems *J.C. Monga, B.D. Bhawe* 201

30 Panoramic objective for endoscopy *K.R. Seetharaman* (L) 272

23 Interference with beams sheared in orthogonal axes *B. Sen, D. Sen* 315

24 Interferometer with holographic optics *I.S. Zeilikovich, E.M. Platonov* 145

25 Measurement of sensitivities for thermal recording of laser beams *C.R. Prasad, K.A. Nirmala, Prabha Venkatesh* 297

26 Moiré displacement measurement technique for a linear encoder *K. Hane, Y. Uchida, S. Hattori* 89

27 Optical measurement of the viability of stored human platelets *M.A. Bellhouse, I. Ross, C.C. Entwistle, B.J. Bellhouse* 27

28 Optical monitoring of glucose concentration *I.N. Ross, A. Mbanu* 31

29 Optimization considerations in the design of active night viewing systems *J.C. Monga, B.D. Bhawe* 201

30 Panoramic objective for endoscopy *K.R. Seetharaman* (L) 272

31 Power handling capability of dielectric-coated, metallic, hollow waveguides for CO_2 laser light *Y. Hiratani, M. Miyagi, S. Nishida* 135

32 Producing binary diffraction gratings in the double-diffraction system *P. Szwaykowski* 255

33 Real-time non-destructive testing of phase objects using four-wave mixing with photorefractive BGO crystals *Y.H. Ja* 36

34 The accuracies of photometric, polarimetric and ellipsometric methods for the optical constants of thin films *L. Ward* 263

35 The identification of fringe positions in speckle patterns, *B.L. Button, J. Cutts, B.N. Dobbins, C.J. Moxon, C. Wykes* 189

36 The Tube Peeper: a new concept in endoscopy *P. Greguss* 41

37 The use of 752.5 and 799.3 nm laser excitation in Raman spectroscopy *K.P.J. Williams, D.L. Gerrard* 245

38 Three dimensional holographic reconstruction of two-dimensional image information from serial sections and its applications in biomedicine *Guo-Ping Zhou* 23

39 Tilt-insensitive film thickness measurement using a double twin path interferometer *K. Hane, K. Yoneda, S. Hattori* 208

Book reviews

Aberration and optical design theory *G.G. Slyusarev* 162
An international conference on thermal infrared sensing for diagnostics and control (Thermosense VI) *Edited by G.J. Burrer* 105
Applications of lasers to industrial chemistry *Edited by R.L. Woodin, A. Kaldor* 273
Excimer lasers, their applications and new frontiers in lasers *Edited by R.W. Waynant* 273
Fiber optic communications *J.C. Palais* 326
Fibre optics multiplexing and modulation *Edited by E.J. Miskovic* 104
Industrial lasers and their applications *J.T. Luxon, D.E. Parker* 218
Infrared optical materials and their antireflection coatings *J.A. Savage* 273
Infrared technology IX *Edited by I.J. Spiro, R.A. Mollicone* 50
Introduction to laser physics *K. Shimoda* 162
Laser applications: volume 5 *Edited by J.F. Ready, R.K. Elf* 163
Laser materials processing *Edited by M. Bass* 275
Optical fiber communications, Volume 1: Fiber Fabrication *Edited by Tingye Li* 274
Optical holography: principles, techniques and applications *P. Hariharan* 217
Optical properties of glass. *I. Fanderlik* 50
Optical radiation detectors *E.L. Dereniak, D.G. Crowe* 218
Optical waves in crystals *A. Yariv, P. Yeh* 217
Proceedings of the Los Alamos conference on optics '83 *Edited by R.S. McDowell, S.C. Stotlar* 48
Pulse code formats for fiber optical data communication: basic principles and applications *D.J. Morris* 162
Semiconductors and semimetals, volume 22; lightwave communications technology, Part B; semiconductor injection lasers, 1 *Edited by W.T. Tsang* 274
Semiconductors and semimetals, volume 22; lightwave communications technology, Part C; Semiconductor injection lasers II, light emitting diodes *Edited by W.T. Tsang* 326
Sources and applications of ultraviolet radiation *R. Phillips* 48
Space laser applications and technology *European Space Agency* 219
The Max Born centenary conference *Edited by M.J. Colles and D.W. Swift* 104
The principles of nonlinear optics *Y.R. Shen* 104

Conference reports

Application of thermal imaging, London, UK, 31 October–1 November 1984, 106
Fibre optic gyroscopes and monomode optical components, Scotland, UK, 1–2 November 1984, 47

NEWS

R&D

Accordion image sensor gives sharper images, 227
British Rail uses fibre-optic communications, 118
Coatings improve photoelectrochemical cells, 3
Cw laser from strained-layer superlattices, 117
Detecting defects in metal strips, 116
Development of 15 kJ laser calorimeter, 172
Fibre-optic sensors for oil platforms, 173
Five-wavelength DFB array, 5
High power switching, 59
Holography as underwater tool, 115
Infra-red light fixture for night surveillance, 283
Largest laser machining centre, 59
Laser guides intense electron beam through gas, 172
Laser helps micro-organism detection, 118
Laser microprobe is successfully demonstrated, 117
Laser propulsion, 116
Laser research into pesticide spraying, 60
Laser techniques measure soot formation, 115
Lasers detect defects in corn, 171
Lowest laser threshold current, 5
Material corrosion analysed with Raman spectroscopy, 4
Medical lectures linked by fibre optics, 3
Problems of long beam paths to be studied, 228
Research to optimize halide lasers, 283
Robotics system for laser metalworking, 284
Space communications using CO_2 lasers, 284
Space shuttle for laser satellite experiments, 4
Three-laser spectroscopy applied to benzene, 171

Industry

Achievement award, 118
Acquisition of spectroscopy company, 120

Agreement for fibre optic distribution in Europe, 6
Air-cooled argon lasers, 121
Breakthrough in optical telecommunications, 120
Brighter future for fibre optics compared with CRTs, 9
Continuation of OSCA endorsed by members, 10
Contract for combined day/night sight, 120
Contract for shipbuilding computer networks, 177
Contract for thermal imaging modules, 176
Control and power systems under investigation, 61
Cooperation in glass fibre transmission techniques, 287
Design and build service for optical components, 65
Development centre for factory automation, 62
Diamond machining for optical components, 122
Digital optical disc agreement, 229
Electro-optical measurements at Olympics, 229
Electro-optics division established, 121
Electro-optic sensors for cartridge cases, 9
Engineering service for fibre-optic systems, 6
Facility for optical fibre production, 176
Fibre-optic cable agreement, 124
Fibre-optic component division formed, 122
Fibre-optic couplers and cable, 174
Fibre-optic test procedure, 176
Fibre optics to monitor boiler combustion, 286
Formation of laser manufacturing company, 231
Group to report on directed energy weapons, 228
Holographic gratings for La Palma telescope, 8
Integrating sphere agent for UK, 286
Japanese contract worth £800 000, 62
Lamp housings, short arcs and power supplies, 8
Laser gyro system to have trials, 176
Laser parts distributor established, 286
Laser patent trial concluded, 230
Lasers for length standard, 64
Lasers pinpoint aircraft in distress, 230
Market export drive for 'CARS', 62
Metal vapour laser company acquired, 61
Office links spur non-telecom fibre optics, 64
Optical and fibre-optic transducer market to grow, 173
Optical coating programme, 120
Optical waveguide fibre patents found valid, 174
Optical waveguide patents infringed, 6
Photomultiplier standards, 9
R&D agreement on lead salt lasers, 286
Refrigerators for optical applications, 60
Sales study of fibre-optic components, 10
Short cavity lasers, 231
Standard for fibre-optic test method, 177
Suit against Japanese waveguide companies, 61
Swiss group invests $38 m in laser company, 230
Test service for fibre attenuation, 177
UK company completes large order for film holograms, 64
UK distributor for laser rangefinders, 8
UK representative for optical meters and detectors, 121
Undersea optical cable laid, 60
Zinc sulphide production, 174

Products

Accessory aids microsurgery, 72
Active connectors for optical fibres, 15
Air-cooled gold vapour laser, 75
Air-cooled lasers have four power ratings, 239
Argon ion lasers, 134
Argon laser for materials processing, 240
Bandwidth of waveguide increased, 186
Beam analysers for CO_2 or Nd:YAG lasers, 232
Beam probes and display plates, 185
Bidirectional optocouplers, 68
Blue HeCd lasers have low noise, 74
Camera tube for low light levels, 238
Ceramic capillary in bi-conical connectors, 241
CMOS compatible optocoupler, 19
Collimator and spatial filter for lasers, 66
Colour for R&D and medical applications, 289
Colour measurement, 133
Colour monitor for in-process measurement, 292
Commercial sub-picosecond laser, 11
Compact CO_2 laser for materials processing, 241
Compact polishers for fibre optics, 69
Connectors are wet termination type, 235
Continuous output laser diodes, 126
Coupler for fibres, 76
Cutting and marking with miniature lasers, 69
Cutting laser stops components moving, 20
Cw Nd:YAG laser has ceramic reflector cavity, 181
Data processors for inspection equipment, 74
Determination of sulphur concentration, 128
Diode laser system for controlled beam, 188
Dispersion-shifted waveguides for long distances, 241
Distribution terminal for optical fibres, 127
Do-it-yourself refill system for gas-ion lasers, 236
Edge emitting LED has fast rise and fall times, 125
Edge sensing improves optical measurement, 288
Electronics for CCD cameras, 181
Engineering service for fibre optics systems, 70
Enhanced thermal imaging by video processing, 231
European suppliers of military laser hardware, 19
Excimer lasers have increased average power, 294
External and internal mirror lasers, 233
Eye-safe laser has 1.5 μm output wavelength, 125
Fast curing with ultra-violet light, 243
Fast-Fourier transform package for the IBM-PC, 293
Fast laser engraving system for silicon wafers, 240
Fast response power and energy monitors, 126
Fault locator operates over 20 km, 236
Fibre coupled LED, 295
Fibre-optic beam delivery system, 295
Fibre-optic components couple to five sizes, 237
Fibre-optic connectors, 66
Fibre-optic link developments, 68
Fibre-optic links and flame-retardant cable, 178
Fibre-optic power meter for data communications, 128
Fibre-optic receiver has high speed, 179
Fibre-optic receiver is a snap-in link, 73
Fibre-optic switching system, 183
Fibre-optic system checker, 184
Fibre optic test method, 238
Fibre-optic transceiver for coaxial drivers, 20
Fibre-optic transmitter/receiver, 238
Field termination of fibre-optics, 20
Fingerprints found with laser and fibre optics, 73

Flatness generator for fast-mirror production, 126
Flexible hose for fibre optics, 14
Flexible laser processing, 16
Frequency doubler accessory for ion laser, 184
Guaranteed arc lamps, 178
Hand held bar code scanner is improved, 180
HeNe laser improved, 133
HeNe laser scanning measures wafer surfaces, 127
High output lasers with no increase in tube length, 177
High performance edge-emitting LED, 129
High power colour centre laser, 71
High precision laser mirrors, 66
Holders for standard size prisms, 12
Hot inspection of composites, 294
Image sensor for industrial checking, 15
Improved miniature photoelectric switches, 289
Improved performance from mirrors, 236
Improved programmable controller system, 242
Improved spectro-photometer for colour measurement, 75
Indium gallium arsenide detectors, 16
Industrial lasers series, 130
Infra-red detectors, 128
Infra-red source for testing, 71
Interference filters, 126
Interferometers and autocollimators, 238
Laser apparatus for acupuncture, 17
Laser beam expanders, 12
Laser diode tester, 289
Laser film plotter for computer-generated images, 73
Laser for communications, 289
Laser has fibre-optic attachment, 290
Laser module with increased output, 235
Laser modules available for custom systems, 13
Laser power meter, 18
Laser printing system for alpha-numerics, 290
Laser ruler for verifying gauges, 178
Laser spotlight bonder for faster wire bonding, 236
Length testing gauges for fibre optics, 16
LED based fibre-optic transmission link, 232
Light beam switch, 187
Light curtain for non-contact measurement, 130
Light losses eliminated in fibre-optic endoscope, 287
Liquid cell has square column construction, 188
Liquid crystal display modules, 288
Long distance fibre-optic communication system, 287
Long travel translation stage, 292
Longer coherence length for Nd:YAG laser, 69
Low temperature vapour deposition, 234
Mainframes have fibre-optic links, 242
Measurement of optical fibres in cables, 12
Measurement of pulse dispersion in fibres, 133
Measuring microscopes have modular design, 126
Measuring with a TV system, 71
Micro-interferometer for optical fibres, 74
Military opto-couplers deliver high gain, 294
Modular and rotating endoprobes, 182
Monitor for laser beam profiles, 292
Monitor for optical fibres, 179
Monitoring small dust concentrations, 233
Multiway, fibre-optic connectors, 180
Night sight has reduced size, 14
Non-contact tachometer uses laser technology,
Optical fibre bundles for robot vision, 70
Optical receiver is suitable for fibre-optics, 75
Optical spectrum analyser for plasma deposition, 17
Optocoupler for high speed optical isolation, 234
Opto-electronic spirit level has digital readout, 187
Output parameters of lasers measured, 186
Passively stabilized reflector, 129
Photodiodes for infra-red measurements, 129
Photon drag detectors for CO_2 laser analysis, 179
Polariscope has data reduction facility, 132
Polishing machines for fibre-optics, 239
Portable and explosion-proof lamps, 70
Portable infra-red thermometer, 65
Power meter for optical fibre systems, 242
Precise optical profilometer uses a laser, 235
Precision pinholes, 71
Programmable laser marker, 290
Radiometer/photometer has automatic zeroing, 124
Receiving and sending devices for fibre-optics, 124
Remote controlled flying video system, 232
Room temperature HgCdTe detectors, 237
Signal handling for optical instruments, 292
Silicon photodiodes for laser ranging, 242
Short focus lenses, 180
Single channel modems, 72
Small monochromator solves laser design problems, 19
Spark gaps for pulse laser switching, 183
Spectrum analyser for laser mode analysis, 69
Splice organizer for 144 fibres, 14
Stress meter for chemically tempered glass, 68
Stroboscope has high output, 182
Suppression of broad band laser noise, 293
Surface contamination measurement, 19
Surface measurement system uses interference, 295
Tables for vibration-free microscopy, 17
Telephone extension system uses fibre-optics, 234
Texture, profile and radius assessment, 20
Translation tables, 291
Transmitter and receiver modules for fibre optics, 12
Trigger for CO_2 laser spark gap, 237
TV systems for UK market, 18
Two cameras for image processor, 240
User friendly laser for OEM applications, 185
Video system cuts inspection times, 13
Wavelength analysis of semiconductor lasers, 72
Wide angle probes for pipe inspection, 15
